

# THE EMPRESS EXPRESS

VOLUME XIX. NO. 31

EMPRESS. ALTA. THURSDAY, Jan. 7th, 1932

Price: \$2.00 Per Year.

R.M. Mantario No. 264

Minutes of Meeting of Monday, Dec. 7th, Orange Hall, Cutbush, 10 a.m.

Present, Reeve Walker and a full council. Meeting was commenced with four members present and Deputy Reeve Dahl in the chair, but the remaining members arrived before the routine committee work was completed.

Dahl—That the Council place on record an expression of their sympathy with Cn. Edwards at the death of his mother, who had been a resident of Div. V for many years and was highly esteemed by all who knew her.

Minutes of previous meeting were confirmed on motion of Cn. Hawtin and motioned that the same be accepted and filed on motion Cn. Edwards.

Committees—Reeve in Alask hospital. Reported that negotiations were proceeding favorably with the Town and the other municipalities and that the question of obtaining a grant as a measure of relief during year 1932 had been taken up with E.S. Whitley by both Dr. Harvey and the Sect-Treas personally, and officially with the Dept. of Public Health. It had also been suggested that Dr. Harvey should obtain the line up of the Didsland Hospital from the Doctor there as a model on which the Alask Hospital might be organized as a practical solution which would not involve difficulties due to the border line between the two Provinces.

Hawtin—That bond fees of Sect-Treas be removed with present company when due.

Dahl—That copy of letter received from P. M. Anderson through the Assoc. of Rural Municipalities advising as to the liability of the Municipality in respect to claim for loss of horses illegally running at large in a bog on a road allowance which had not been constructed be forwarded to Roy Hunter. Advice received was to the effect that the position of the Municipality was that of hav-

Rev. Geo. A. Shields,  
Minister.

ing a "perfect defence" to such claim.

Dahl—That a vote of thanks be recorded on the minutes to the Rev. Patton, of McGraw, Out, for the relief car sent to us.

Reeve—For distribution, to the Prairie Times Relief Fund, Didsland, for their gift of flour and granaries, and to Miss Lucy Fraser, of the Didsland school for the gifts of clothing received through her organization of the children of the school, and that the Secretary communicate to all of the above our hearty thanks and appreciation of their valuable gifts.

Reeve—That Cn. Dahl be a committee in charge of office contents.

Dahl—That report of Inspector Matthews after his visit to the Municipal office be accepted and filed.

Accounts examined by Baner committee and passed for payment:

Alask Hospital, \$8.50; Empress Hospital, 21.00; Postage, etc., Sea-Tross, 41.68; Manton, 7.50; L. D. Phone calls, Reeve, 3.20; Empress Express, 8.10; Roads Div. V, 1.50; S. Bak, 1.00; Roads Div. VI, Day Sheet, 32.50; Div. IV, P. Revit, 6.75; Div. I, May 3.60; Stan. Tossell, 10. F. Francis, 13.40; General Express Line, Yds. 30.

Reeve—That bill of Alask Hospital be paid.

Reeve—That bill of Empress Hospital be paid

## Italian Ship Founders In Mediterranean And Thirty Sailors Drowned

Maddalena, Sardinia.—Thirty sailors and marines were thought to have drowned when the Italian tug "Teseo" sank in a storm off the coast of Sardinia.

More than 100 persons were rescued by the steamer "Trieste" after hours of struggling efforts to launch boats and shoot flares to the founders vessel.

The "Teseo" ran aground, a terrible gale was blowing out of the west. Vessel and crew were taken by Tyrrhenian Sea, on the Italian mainland, its rudder and its masts were swept away. After 12 hours it was only 20 miles from this coast.

The tug sent out several SOS calls, leading to the rescue. Vessel and crew were taken by Tyrrhenian Sea, on the Italian mainland, its rudder and its masts were swept away. After 12 hours it was only 20 miles from this coast.

The tug sent out several SOS calls, leading to the rescue. Vessel and crew were taken by Tyrrhenian Sea, on the Italian mainland, its rudder and its masts were swept away. After 12 hours it was only 20 miles from this coast.

The "Trieste" rode back and forth, close to the foundering boat, for four hours, shooting lines to get short and long to launch boats in the violent seas.

The "Teseo" finally sank at 9:30 a.m., after nearly 100 men had been rescued by the "Trieste," which picked up a few more before the cruiser put to port, leaving the cruiser "Ancon" on the spot, searching for other survivors or bodies of the drowned.

## France Taxes Canadian Goods

### Are Exempt If Coming Through Other Lands

Paris.—A new tax of 15 per cent ad valorem surtax on products of Argentina and Uruguay and an 11 per cent surtax on Canadian goods to compensate for the indirect extra premium enjoyed by those countries owing to depreciation of their currencies, was published in the official journal.

Goods proposed to be passing through those countries from other lands are exempt from the surtax and goods already on the way before the decree was promulgated remain subject to previous regulations.

### Want Quota Broadened

#### Council Of Agriculture For England Would Include Barley

London, England.—The council of agriculture for England adopted a resolution to recommend to the government proposals for a wheat quota should be broadened to include malting barley and that anti-dumping tariffs should be applied to imports of wheat and barley and made effective for the 1931-32 season.

John Gilmour, minister of agriculture, in a speech before the council, promised further measures dealing with the agricultural industry would be forthcoming shortly.

#### Refuse To Pay Rent

Ahmedabad, India.—A hundred thousand peasants in 800 villages throughout this district, took part in "a rent" demonstrations and swore a common oath to refuse payment of rents. The proceedings were superintended by members of the Nationalist Congress.

## Raw Material Bought By Canada Through States Benefits American Firms

Winnipeg, Man.—Plans to free Canadian trade from the tribute it now pays to banking, brokerage, shipping and warehousing services in the United States are being studied by the Dominion Government, Hon. H. Stevens, Minister of Trade and Commerce, stated here yesterday. He said, negotiations have been entered with three branches of manufacturing industry to induce them to cease buying imported raw materials through United States agencies.

To receive 100 per cent. the value of the Canadian dollar in New York, Mr. Stevens said, had demonstrated more forcibly than ever before that Canada was too dependent on the United States.

Early last year, the Minister said, the country imported millions of dollars worth of rubber from the East Indies, millions of dollars worth of hides from the Argentine, large quantities of wool from New Zealand and of coffee from Brazil and silk from

### Industry Must Prepare For Imperial Conference

#### It Is To Result In Intimate Economic Partnership

London, Eng.—Industry throughout the Empire must organize itself and take a leading part in the preparations for the Ottawa International Conference, says the London Times, in an editorial headed "Industries and Ottawa." It expressed the opinion great satisfaction will be manifested throughout the Empire after Mr. Hon. Edmund L. Newcastle, Dominion Secretary, makes his statement to the House of Commons.

"But," adds the Times, "much more than government departments and partnerships will be required to make the Ottawa conference a success. Industries themselves, both here and in the Dominions, must prepare if the conference is to result in intimate economic partnership." It should, therefore, be clear that the announcement of the British government's policy should be definite enough to encourage industries to start preparation."

### British People Help Financial Distress

#### Gives Valentine For Auction Bringing \$5,700 To Treasury

London, England.—The national treasury gained about \$5,700 when jewelry, gold coins and trinkets, given gratis in aid of financial districts, were auctioned. It was the most unique sale in the long history of Christie's.

The valuations were sent to R. H. Phillips, controller in the last days of the war, who recommended the valuation of stations of life. They represented sacrifice to the nation; some came from obscure women and we the sole remaining voices of their younger days when their families were prosper. Each item and its estimate was given so the donor might know the amount subscribed to the treasury.

Among the coins were two pounds minted for President Kruger of South Africa, a gold five-pound piece and a gold spade guinea.

#### Needs Money For Work

New York, N.Y.—With Miss Elizabeth Stevens, wife of the Minister of Agriculture, and her son, Mr. Wilfrid Grenfell, Labrador explorer and social guardian, sailed for Europe in quest of \$100,000 to meet a deficit in his altruistic operations. He said his savings, orphans, hospitals and other foundations required \$210,000 for the next year, with only \$110,000 on hand.

#### Critical Of League

Montreal, Quebec.—The Manitoba Guardian, which has been critical of the League of Nations during the current Manchurian debate, carried an editorial describing the League council's efforts to solve that dispute as "futile and weak efforts which only served to make the League appear contemptible in the eyes of the world."

### Supreme Court Judge Dead

Hon. Edmund L. Newcastle Taken Ill During November Session

Ottawa, Ont.—A Justice of the supreme court of Canada since 1924, Hon. Edmund L. Newcastle, C.M.G., 72, died.

He was present at the beginning of the November session of the supreme court, but took ill during the sitting.

He was born in Cornwallis, Nova Scotia, and received his education in that province. He graduated from Dalhousie with the degree of bachelor of law in 1903, and was admitted to his bar in 1905. He was called to the bar in 1883, and in 1893 he was admitted to the bar of Ontario, and the same year was appointed queen's counsel.

On March 13, 1893, Mr. Newcastle was appointed solicitor minister of justice.

From 1902 to 1906 Mr. Newcastle was chairman of the select committee appointed to revise the statutes of the Canadian Parliament.

"But," adds the Times, "much more than government departments and partnerships will be required to make the Ottawa conference a success. Industries themselves, both here and in the Dominions, must prepare if the conference is to result in intimate economic partnership." It should, therefore, be clear that the announcement of the British government's policy should be definite enough to encourage industries to start preparation."

From 1906 to 1911 he was chairman of the select committee appointed to revise the statutes of the Canadian Parliament.

"But," adds the Times, "much more than government departments and partnerships will be required to make the Ottawa conference a success. Industries themselves, both here and in the Dominions, must prepare if the conference is to result in intimate economic partnership." It should, therefore, be clear that the announcement of the British government's policy should be definite enough to encourage industries to start preparation."

From 1911 to 1914 he was chairman of the select committee appointed to revise the statutes of the Canadian Parliament.

"But," adds the Times, "much more than government departments and partnerships will be required to make the Ottawa conference a success. Industries themselves, both here and in the Dominions, must prepare if the conference is to result in intimate economic partnership." It should, therefore, be clear that the announcement of the British government's policy should be definite enough to encourage industries to start preparation."

From 1914 to 1918 he was chairman of the select committee appointed to revise the statutes of the Canadian Parliament.

"But," adds the Times, "much more than government departments and partnerships will be required to make the Ottawa conference a success. Industries themselves, both here and in the Dominions, must prepare if the conference is to result in intimate economic partnership." It should, therefore, be clear that the announcement of the British government's policy should be definite enough to encourage industries to start preparation."

### Asks Investigation Of Factory Exodus

#### Tariff Blamed For Exodus Of Plants

Washington, D.C.—The exodus of factories from the United States to Canada was the subject of a resolution introduced into congress by Representative Harry C. Canfield, Democrat, Indiana. Mr. Canfield called for a committee to inquire into the matter.

"Misled," asked the Canadian Press, "is it not the purpose of this commission to demonstrate to the country that the reason for the factory exodus is the tariff?"

"Misled," said Mr. Canfield, "but I think everybody knows that the reason factories are going away from here."

The representative said he had observed that many factories were going abroad because of the high cost of living. He had investigated and discovered that labor conditions in Canada were about the same as in the United States.

Therefore, he had concluded to ask for a congressional committee to investigate.

#### Champion Jumper Married

Toronto, Ont.—The champion girl jumper of the world and most beautiful girl in Canada, at last Olympe de la Poer, Miss Elizabeth Stevens, has married for more than two years to James McLaren, a young business man of this city, and the fact has kept a close secret.

On November 25, 1929, Rev. R. S. Laird performed the ceremony. On the marriage license the bride's age is given as 21 and the groom's as 22.

#### Population Of France

Paris, France.—The total population of France is 41,834,923, complete returns from the census conducted last spring revealed.

The department of the Seine, which includes Paris, has 4,833,855 inhabitants. The increase in all France since 1926 was 1,091,976.

#### Portage La Prairie, Man.—George R. Porter, editor of the Portage La Prairie Daily Times, has been elected president of the Manitoba branch of the Alberta Fish and Game Protective Association.

Mr. Porter, who has been a member of the association for 10 years, succeeds Mr. W. T. Stait, of Brandon.

## Movement To Have All Eastern Shipments Of Grain Routed Through Canadian Ports

"No obstacle that can be overcomes stands in the way of Canadian grain traffic through all Canadian ports." Such was the conviction voted at Halifax recently by Col. Eric C. Phinney, chairman of the Halifax Harbour Commission.

Spurred by a similar decision to secure co-operation in furtherance of a campaign to acquaint all sections of Canada with "the fact that inland sections of this country will benefit the most from a turn-around movement of grain from the interior," Mr. Phinney is also chairman of the seed board of Alberta.

His statement refers to reports from the University of Saskatchewan lauding the Reliance variety and naming it superior to Marquis.

"Reliance is a new variety of spring wheat produced by J. Allen of the division of cereal crops and diseases, United States Department of Agriculture," Mr. Stewart states. "It is a hybrid selected from a cross between Marquis and Kauka, the latter a winter wheat."

Kauka has yet to be proven capable to withstand

### Farmers Should Be Loyal To Marquis

Until Further Information Regarding Reliance Wheat Is Received

G. M. Stewart, District Inspector of Weights and Measures, Department of Agriculture, Calgary, advised Alberta farmers to remain loyal to Marquis wheat until further information is received regarding the new wheat variety as Reliance. Mr. Stewart is also chairman of the seed board of Alberta.

His statement refers to reports from the University of Saskatchewan lauding the Reliance variety and naming it superior to Marquis.

"Reliance is a new variety of spring wheat produced by J. Allen of the division of cereal crops and diseases, United States Department of Agriculture," Mr. Stewart states. "It is a hybrid selected from a cross between Marquis and Kauka, the latter a winter wheat."

Kauka has yet to be proven capable to withstand

"Tests at the University of Alberta have shown that Kauka is not rust resistant and is susceptible to bunt, or smutting smut. Reliance lodges badly and requires five days more for maturity than Marquis. The average yield of Reliance for the last three years at the university farms is three bushels less per acre than Marquis."

"A unofficial gathering of official men," sponsored by W. H. Dennis, managing director of the Halifax Herald, brought together some 200 representatives of government, civic and business interests.

They heard Col. Phinney, who has just returned from a western survey of grain traffic possibilities, instance difficulties overcome by Vancouver in building grain terminals in the city for its port.

"They proved," he said, "that you must have ballast to secure a turn-around movement of ships—and that we get the grain the ships will come."

Interest in the fair proportion of Canadian traffic to Canadian channels would benefit not only these ports, but inland sections, he concludes.

Contention that Canadian lines could not compete with foreign lines was answered by himself, who had testified they could not estimate the cost of hauling any given commodity from one point to another.

"Figures indicate," he added, "that the two lines compete to Halifax and St. John over the Transcontinental at the rate we ask, can make more money than it can by hauling any commodity anywhere else in Canada."

"As far as we let details on the Transcontinental pile up because of non-use?" he asked. "Isn't it better if necessary to lose, and I don't think it is, to lose the amount of money in operating than doing nothing?"

Telegrams of endorsement of the movement for grain shipments through Canadian ports were read from M. E. Nichols, Winnipeg Tribune; E. H. Gandy, Manitoba Free Press; and John M. Innes, Edmonton Journal; J. H. Woods, former president of the Canadian Chamber of Commerce; J. D. McKenna, St. John Telegraph-Journal; and R. J. Cromie, Vancouver Sun.

**Coaches Named For Royalty**

Tourists who land at Plymouth, England, will travel henceforth in railway coaches named for the royal family.

New type "luncheon" cars can have their roofs removed to cater to tourist demands, and will bear the names of "King George," "Queen Mary," "Prince of Wales," "Duke of York," "Duchess of York," "Duke of Gloucester," "Princess Mary," and "Princess Elizabeth."

**People Are Warned**

A radio announcement states that a certain crowner will be heard from a certain network every evening at a certain hour. Very kind of the broadcasters to issue that warning.

185 GIRL'S SUSPENDER DRESS

Girls' summer dress, consisting of a white blouse and skirt. Blouse has an attached collar, patch pocket with lap, and set-in sleeves that are gathered at the shoulder. The flaring skirt with attached yoke and suspender straps that cross at back. Back length 30 inches.

Years 6 8 10 12 14  
Breast 24 26 28 30 32 inches  
All patterns 25c in stamps or coin (coin preferred). Wrap coin carefully.

### How To Order Patterns

### New Breed Of Rabbit

Has Fur Colour and Texture Of Beaver Is Claim

A new breed of rabbit, with fur the color and texture of beaver has been developed after twelve years of scientific experiments by C. E. Rex, Rabbit Breeder, Federation, Chicago, announced perfection of the breed prior to opening of the first display of the offspring of the Rex-Rabbit family.

The rabbit, scientifically attributed to a mutation or a biological change in cell, reached its present development in this country after discovery 10 years ago in France.

Through the efforts of the Monda law, Dr. Friend reported successful experiments have also been carried out in the development of rabbits bearing fur closely akin to ermine, seal and chinchilla.

### Government Rejects Manitoba Farm Plan

Unemployment Relief Measure Turned Down By Federal Authorities

Piano to place selected families on Manitoba farms as an unemployment relief measure, proposed by the province, was rejected by the federal government.

Under the plan, the federal government would contribute half equally to the provincial government and the city of Winnipeg.

Reliance, Mr. Stewart says, is now in North Dakota and Montana where the soil is drier. If it is used at all in Alberta it will have to be in the dry soil areas, he concludes.

Nothing Changed

Many years after graduating from his alma mater, a professor managed to obtain a faculty position there. Both as a new member of the faculty and as an alumnus he was given his old room in the faculty houses.

"The same old double-decker," he muttered, "same old bathroom, same old pictures, same old carpets."

Then he opened the door of another room and found there a young student who had just graduated.

"En-sue, my sister, professor," said the student.

"Same old lies," muttered the professor again, backing out of the room.

"Be sure you're right—then go ahead" may be good advice, but not always for pedestrians.

The common name of the cicada is cicada."

### Shetland Sheep Wool Made Into Blankets

Imported Flock Owned By London Men Vieira Hirsch Clip

The only Shetland sheep wool blankets ever made in Canada were made for Dr. Hugh and W. J. Stevenson, the wool being this year's clip from the flock owned by the Londoners at the Pond Farm.

These blankets are uncoloured, but retain the natural chocolate brown tone of the wool just as it grows on the backs of the hardy little island sheep. The texture of the blankets is smooth, soft and durable.

These little known sheep were brought to Western Ontario from Shetland by Drs. Stevenson two years ago, and have proved both adaptable to the climate and to the market. They are remarkably fine and long and yields a fairly heavy clip. The sheep themselves, though a wild breed, have a homing sense that helps to bring them back to the fold, and as must be expected, they are excellent.

### Saves Keeping Roads Open

Airplanes Carrying Supplies Weekly To Northern Relief Camps

Making their first trip December 4, planes to take supplies to relief camps in northern Ontario, the first year to take supplies to relief work at Prince Albert, took on a load of 350 pounds, and then took off for the village of Wabigoon in the north end near where boundary is being cut out by single jobbers transients. Other camps are to be opened up, and from now on the trips will be made regularly.

This is considered a simpler solution of the problem of supplying the camps with food by attempting to keep roads open. Flight Lieutenant G. W. P. McLean, commanding stationed at the R.C.A.F. base at Leader Lake, is piloting the two planes being used.

### Why Year Was Tough

"This is a difficult, long year," an expert frequently heard among business men when discussing their business and the prospects for a good fall and winter trade. It has been pointed out, however, that there are in the sawmills band saws, Dadoes, jointers, planers, etc., which will not be used before winter, and at maturity yields the maximum in utility value.

It is not realized that many of our hardwood forests are going to waste. Good forestry practice requires a tree to grow 100 years before it is matured before it is cut, and at maturity

is when it reaches its peak. In fact it has been demonstrated that Canadian woods are in many cases not only equal but superior to imported hardwoods.

It is not realized that many of our hardwood forests are going to waste. Good forestry practice requires a tree to grow 100 years before it is matured before it is cut, and at maturity

is when it reaches its peak. In fact it has been demonstrated that Canadian woods are in many cases not only equal but superior to imported hardwoods.

## WORLD HAPPENINGS BRIEFLY TOLD

The Soviet Government is preparing to discard the famous Communist system of rationing food and clothes. Britain will make no binding trade agreements until the outcome of the Imperial Conference is known.

Central heating is proposed for Churchill, Manitoba's new seaport on Hudson Bay.

Captain Tikhon N. Agapayeff, former commander of the Russian Imperial Navy, died suddenly at Halifax. He had been in Churchill, noted British statesman, in a lecture tour in the United States.

Improved train facilities are greatly needed in Peace River country. E. H. Kiehl, delegate to the Alberta pool meeting, declared.

Population of Russia, 1950, the latest estimate, is 150,000,000.

The peal of bells of St. Peter's has been heard for the first time in many nations in a broadcast from the Vatican radio station.

Miss Ethel Catherine, Student Olympia, has been taken up residence in San Francisco where she will remain until after the 1932 Olympic games.

Unless a solution is found for the present problem in the dairy industry of the province, Quebec faces the possibility of the abandonment of 40,000 farms.

The Department of Public Works, Ottawa, has approved of a combined highway and railway bridge which the Fraser River Bridge Company propose building at Port Mann, British Columbia.

## Means Valuable Saving

### Canada's Energy Requirements Met By Water-Power Industry

The water-power industry in Canada supplies nearly the entire energy requirements of the country, except for that utilized in the production of railways, automobiles, etc., and as a further measure of its importance it may be mentioned that the capital investment involved is rapidly approaching a billion dollars annually. The records of the Dominion Power and Hydroelectric Bureau, Department of the Interior, show that during 1930 upward of twenty billion kilowatt hours of energy were produced by the power companies, the average coal consumption per kilowatt produced in the public utility plants in the United States, indicates an actual saving of 17,500,000 tons of coal in 1930. When we consider that the distance of upwards of 2,300 miles across Canada no coal mines exist the value of this saving becomes apparent.

## Special Soviet Stamp

### Carries Design of Four Riders In Mad Race

On the occasion of the tenth anniversary of the organization of the Red Army's first regular cavalry detachment a special stamp which bears a design strikingly similar to the traditional picture of the four horsemen of the Apocalypse was issued by the Soviet Government. Four riders are shown in a mad race across the face of the stamp, on which is written "The Four Horsemen of the Last Judgment." The other nations ride in the same boat. But there should be a lesson in it for all of them. Have they learned the lesson? Not so that anyone can notice it. They are spending more for war preparations right now than ever before. —Kitchener.

## Sold Member's Hat

Vincent Carter, member of the United States House of Representatives from Wyoming, entered a shop where many odds and ends were displayed to a passing crowd. He respectfully put down his hat and walked around. In less than no time the saleswoman had sold the hat for the benefit of a hospital in Ketchikan, Alaska.

"Your daughter is learning to sing," he said to her.

"Yes. Already two tenants below have moved," Lustige Kolner Zeitung, Cologne.

W. N. U. 1920

## North Country Brought Close To Civilization

### Remote Settlements Served By Chain Of Wireless Stations

Ten years ago communication between points within the North West Territories and the world at large involved a delay of weeks during the winter. Seven years ago the Department of the Interior, through its North West Territories and Yukon Branch, took the first step towards bringing the north country closer to civilization. With Edmonton as the base, a series of stations was built which served Simpson on the Mackenzie River as well as Dawson and Mayo in the Yukon Territories.

Since that year the northern service area has been extended to include Fort Smith, Resolution, Simpson, Norman, Atlin, and Herschel Island on the west with Coppermine and Chesterfield Inlet to the east, and equipped with wireless sets which handle both commercial messages and news bulletins to and from all parts of the world. In addition some of the more northerly offices are equipped with broadcasting plants by means of which they are enabled to send out regular messages and daily news bulletins to the more remote settlements.

## Grain Show Held

### At Prince Albert

#### Fine Samples Of Wheat And Oats Were Exhibited

With a view to producing grain of sufficiently high quality to exhibit at the World's Grain Show at Regina, Sask., in 1933, the Prince Albert Board of Trade staged a grain show recently.

The samples exhibited were produced from seed sent out by the board to the most successful growers of the district. There were 15 lots of wheat, 10 lots of oats, 10 lots in five-bushel lots, and ten lots of Marrowolds of five bushels each.

The exhibit showed fine results in both classes, the winners being chosen on basis of soundness, colour, freedom from dust, and from other varieties of grain.

Professor Massey Chapple, of the Field Husbandry Department, Saskatchewan University, was the judge. The yield of the grain on an acre was 50 bushels per acre; oats, 90 to 100 bushels per acre. There were 20 exhibitors in all. First, second and third prizes were awarded in both classes and comprising three, two and one sacks of the best grade of flour produced by the Waakota Milling Company.

## Have Not Learned Lesson

### Nations Paying For Last War Are Preparing For Next War Are

Taxes are high—federal, provincial and municipal—entirely too high, most people think. But has it occurred to the average citizen that taxes are not the only burden imposed by the Dominion Government; forty-two dollars go to pay for the cost of the recent war? The interest on the war debt, penalties for disabled men, provision for war-time dependents and the like is the war debt, cost the country that tremendous proportion of our national income. And it will so continue so long as most of us live.

That cannot be avoided now and neither can the other nations ride in the same boat. But there should be a lesson in it for all of them. Have they learned the lesson? Not so that anyone can notice it. They are spending more for war preparations right now than ever before. —Kitchener.

## Floodlighting For Ships

Merchant ships will soon adopt the style of floodlighting and navigation lights to go sea floodlit in a way that will make their identity clear at greatest distances, in the opinion of Samuel G. Hibben, manager of the electric department of the Bethlehem Steel Lamp Company. Electric lines have already developed the idea, notably the North German Lloyd, whose liner "Europa" carries a large electric sign amidships on each side bearing forth her name.

## New Radio Microphone

A new radio microphone weighing a new radio microphone weighing two and a half pounds, about three inches in diameter, and of approximately the same thickness, has been designed to be operated effectively in rainy weather or in any position. It requires no local amplifier or battery such as is employed with the condenser microphone.

"The compass," said the young man, who knew a lot about everything, "always points north, you see."

"Then it's just too bad," sighed the beautiful girl, "if you happen to want to go south, isn't it?"

## CANADIAN MISSIONARIES SAIL FOR LIBERIA

This picture shows Miss Florence Stacey, Rev. Edward Hincox and Mrs. Hincox, three missionaries from the Union of Regular Baptist Churches of Ontario and Quebec, who sailed from Montreal on the "Ascania" to take up missionary work in Liberia.

## Production Falls Behind

### Soviet Government Has Failed To Meet Canadian Expectations

The Communists' slogan—"Prada" admits that Soviet Russia "has failed to fulfill its 1931 program under the five-year plan in certain branches of industry, but predicted that the entire plan would be more than fulfilled in four years from the end of 1932."

Industrial production for the first 10 months of 1931 was only 19 per cent over that of 1930, the newspaper said, whereas the plan called for a 45 per cent increase for the whole year in comparison with last.

The exhibit showed fine results in both classes, the winners being chosen on basis of soundness, colour, freedom from dust, and from other varieties of grain.

Professor Massey Chapple, of the Field Husbandry Department, Saskatchewan University, was the judge. The yield of the grain on an acre was 50 bushels per acre; oats, 90 to 100 bushels per acre. There were 20 exhibitors in all.

First, second and third prizes were awarded in both classes and comprising three, two and one sacks of the best grade of flour produced by the Waakota Milling Company.

The exhibit showed fine results in both classes, the winners being chosen on basis of soundness, colour, freedom from dust, and from other varieties of grain.

Professor Massey Chapple, of the Field Husbandry Department, Saskatchewan University, was the judge. The yield of the grain on an acre was 50 bushels per acre; oats, 90 to 100 bushels per acre. There were 20 exhibitors in all.

First, second and third prizes were awarded in both classes and comprising three, two and one sacks of the best grade of flour produced by the Waakota Milling Company.

CHAPTER VIII.—Continued.

The idea that she might be an unwelcome arrival at Staple had been with Jean (lively consciousness) and not of the time she had accomplished the necessary change of train at Exeter, and found herself being trundled along on the leisurely branch line which connected the two stations. Her destination, she had succeeded in putting herself into a condition that almost verged upon panic.

"Coomba! Ee-avie! Coomba Ee-avie!" The sing-song intonation of a determined young girl, from a low note, rose higher than the ascending in contrary motion abructly from high to low, was punctuated by the sharper, clipped pronouncement of the stationmaster as he hustled up the long platform leading to the "Fair Lady." "Ready! Ready!" with a maddeningly insistent insistence that reminded one of a cuckoo in June.

Apparently both stationmaster and porters were porters, and in the frenzied struggle and antarctic effect they were producing to observe that any passenger, handicapped by luggage, contemplated descending from the train—unexpected arrivals were not the order of the day. Miss Peterson—but you must acknowledge it was something in the nature of a surprise to find that you were there!" Jean had said.

"It's given you an unfair advantage, too," she replied. "I still haven't penetrated your incognito—but I suppose you are Mr. Brewster?"

"No, Mrs. Brewster is my mother's friend."

"I'm Mrs. Tormain, and

as my mother was unable to meet you herself, I came instead. Shall we go? I'll give the stationmaster instructions about your luggage."

So off they went, the station-

master and the deputized group,

in astonished admiration before the numerous trunks and suitcases, labelled "Peterson," which the luggage van of the departing train had held.

To the benevolent mind, such an unwanted accumulation argued a passenger of quite superlative importance, and with one accord the combined glances of the station staff ranged over the train to discover Jean standing somewhat forlornly in the middle of it, surrounded by the smaller fry of her luggage. The stationmaster hurried forward immediately to do the honors, and Jean addressed him eagerly.

"I've got a faerie-cab"—correcting herself hastily—"to take me to the Manor. Please."

The man shook his head.

"There are no cabs here, miss," he faltered, "but I agree with you." Wincott's wagonette in advance, Jean, seeing Jean's face lengthen, he continued hastily: "But if they're expecting you up at Staple, miss, I'm sure to send one of the cars to meet you. It's a pity, though, that the chug-chug of an approaching motor came to them clearly on the crisp, cold verge!"—"that'll be it, for certain."

Followed the sound of a car braking to a standstill in the road outside the station, and almost immediately a masculine figure appeared advancing rapidly from the lower end of the platform.

Even through the dusk of the winter's afternoon Jean was struck by something curiously familiar in the man's easy, swinging stride. A surge of memories came flooding over her,

Again... those monthly pains! Lydia E. Pinkham's Vegetable Compound relieves those headaches and awful cramps. Try it before you break another date!

W. N. U. 1920

and she felt her breath catch in her throat at the sudden possibility which flashed into her mind. For an instant she was in doubt—the thing seemed so amazingly improbable. Then, touching his hat, the stationmaster turned his head aside, and she found herself face to face with the unknown Englishman from Montana.

"He gazed at her curiously, and for a moment he was too sensible to attack. His eyes met hers in a startled, leaping glance of recognition and something more, something that set her pulses racing steadily.

"She should have sworn the words had been his, almost in the same instant, she saw the old, rather weary gravity replace the sudden fire that had blazed up in the man's eyes, quenching its light.

"You're—Miss Peterson?"

There was no pleasure, no welcome in his tones; rather, an undercurrent of ironical vexation as though fate had played some sourly trick upon him.

"Yes." The brief monosyllable came baldly in reply; how to know him, how to meet his mood. Then, hastily calling up her reserves, she went on lightly: "You don't seem very pleased to see me. Shall I go away again?"

His mouth relaxed into a grim smile.

"This isn't 'Clapton Junction,'" he answered tersely. "There won't be a train for ten o'clock tonight."

A glut of humor danced in Jean's eyes.

"In that case," she returned gravely, "what do you advise?"

"I advise you to go home."

"I apologize." Please forgive such an ungracious reception. Miss Peterson—but you must acknowledge it was something in the nature of a surprise to find that you were there!" Jean had said.

"It's given you an unfair advantage, too," she replied. "I still haven't penetrated your incognito—but I suppose you are Mr. Brewster?"

"No, Mrs. Brewster is my mother's friend."

Thursday, Jan. 7th, 1932

Miss Flock returned from her holiday vacation on Monday.

Rossell Bassarab visited here over Christmas.

Mrs. Howe, spent the Christmas holidays in Edmonton.

Martin Nielsen, who spent the holidays in Calgary, returned on Monday.

The Annual Meeting of St Mary's W. A., will be held on Tuesday, January 12, 1932, at 2:30 p.m.

The Bustart Junior Hockey Team defeated the local Union Hockey Team in a well-contested game on Tuesday evening.

A heavy covering of snow is over the whole countryside and motor car travel is practically at a standstill.

Mrs. E. S. Sexton returned on Monday from a visit with her daughter at Calgary.

Miss J. Kelley is teaching Miss B. Maxwell's classroom during the latter's absence.

We received a remembrance card this holiday-time from J. Palooki, who is now located at Okotoks, Alta.

Miss M. Peers, of Calgary, arrived in town on Monday night, and is visiting the home of Mr. and Mrs. E. B. Fenton.

Miss Agnes Gillespie, of Pincher Creek, was a visitor in town during New Year's week, renewing acquaintances.

Mr. and Mrs. S. Bowers, of Calgary, visited with Mr. and Mrs. E. H. Fountain during the holidays.

D. Durk, sr., suffered a severely lacerated hand, cutting into the sheath of his fingers and thumb, when he had the misfortune to fall on some short iron, while working on a job at the theatre.

The local Junior Hockey Team and the Town team contested home games on New Year's Day, with the Juniors winning. Both teams then played each team in turn on the local ice, and were defeated in each instance.

## Begin Early

It is necessary to make an early start if the teeth are to last a lifetime and if pain, discomfort and the ill-effects of dental infections are to be avoided. The crowns of temporary teeth are practically formed when the child is born. The quality of the teeth depends chiefly upon diet, so that of the mother during

and tax collector may have been limited to the infamy stage of the school district but the district is now large and important enough to have three dependent trustees who are not interested directly or indirectly in any salary or other remuneration derived from an office held under the Board.

The years of growth are the most important periods of life. During these years, the body is served chiefly by temporary teeth, which are thus of great importance and should never be neglected. The temporary teeth are a necessary part of the child's digestive system;

they are used to chew food and mix it with saliva.

Neglect of the temporary teeth causes discomfort and pain. The teeth should be allowed to remain in the mouth until nature removes them by the natural process, because not only are they used for chewing, but they also hold the

gums and teeth need exercise as much as do other parts of the body. Crusts and fibrous vegetables supply the exercise needed.

The teeth should be kept clean

by regular brushing night and morning. Regular visits to the dentist will permit of the early detection of small decayed spots, which if cared for im-

mediately will prevent any serious damage.

Begin early, and help your child to keep his teeth through life.
